ROS Indigo Cheatsheet

Filesystem Management Tools

rospack	A tool for inspecting packages.
rospack profile	Fixes path and pluginlib problems.
roscd	Change directory to a package.
rospd/rosd	Pushd equivalent for ROS.
rosls	Lists package or stack information.
rosed	Open requested ROS file in a text editor.
roscp	Copy a file from one place to another.
rosdep	Installs package system dependencies.
roswtf	Displays a errors and warnings about a running ROS system or launch file.
catkin_create_pkg	Creates a new ROS stack.
wstool	Manage many repos in workspace.
catkin_make	Builds a ROS catkin workspace.
rqt_dep	Displays package structure and dependencies.

Usage:

```
$ rospack find [package]
$ roscd [package[/subdir]]
$ rospd [package[/subdir] | +N | -N]
$ rosd
$ rosls [package[/subdir]]
$ rosed [package] [file]
$ roscp [package] [file] [destination]
$ rosdep install [package]
$ roswtf or roswtf [file]
$ catkin_create_pkg [package_name] [depend1]..[dependN]
$ wstool [init | set | update]
$ catkin make
```

Start-up and Process Launch Tools roscore

The basis nodes and programs for ROS-based systems. A roscore must be running for ROS nodes to communicate.

Usage:

\$ roscore rosrun

Runs a ROS package's executable with minimal typing.

\$ rosrun package_name executable_name

Example (runs turtlesim):

\$ rqt_dep [options]

\$ rosrun turtlesim turtlesim_node

roslaunch

Starts a roscore (if needed), local nodes, remote nodes via SSH, and sets parameter server parameters.

Examples:

Launch a file in a package:

\$ roslaunch package_name file_name.launch

Launch on a different port:

\$ roslaunch -p 1234 package_name file_name.launch Launch on the local nodes:

\$ roslaunch --local package_name file_name.launch

Logging Tools

rosbag

A set of tools for recording and playing back of ROS topics. Commands:

Record a bag file with specified topics. rosbag record rosbag play Play content of one or more bag files. Compress one or more bag files. rosbag compress rosbag decompress Decompress one or more bag files. Filter the contents of the bag. rosbag filter

Examples:

Record select topics:

\$ rosbag record topic1 topic2 Replay all messages without waiting: \$ rosbag play -a demo_log.bag Replay several bag files at once: \$ rosbag play demo1.bag demo2.bag

Introspection and Command Tools

rosmsg/rossrv

Displays Message/Service (msg/srv) data structure definitions.

ζ,	/omman	as:	
	rosmsg	show	Display the fields in the msg/srv.
	rosmsg	list	Display names of all msg/srv.
	rosmsg	md5	Display the msg/srv md5 sum.
	rosmsg	package	List all the msg/srv in a package.
	rosmsg	packages	List all packages containing the msg/srv.

Examples:

Display the Pose msg:

\$ rosmsg show Pose

List the messages in the nav_msgs package:

\$ rosmsg package nav_msgs

List the packages using sensor_msgs/CameraInfo:

\$ rosmsg packages sensor_msgs/CameraInfo

rosnode

Displays debugging information about ROS nodes, including publications, subscriptions and connections.

Commands:

Test connectivity to node. rosnode ping List active nodes. rosnode list

Print information about a node. rosnode info List nodes running on a machine. rosnode machine

rosnode kill Kill a running node.

Examples:

Kill all nodes:

\$ rosnode kill -a

List nodes on a machine:

\$ rosnode machine agy.local

Ping all nodes:

\$ rosnode ping --all

rostopic

A tool for displaying information about ROS topics, including publishers, subscribers, publishing rate, and messages.

Commands:

rostopic bw Display bandwidth used by topic. Print messages to screen. rostopic echo

Find topics by type. rostopic find rostopic hz Display publishing rate of topic.

Print information about an active topic. rostopic info

List all published topics. rostopic list rostopic pub Publish data to topic. Print topic type. rostopic type

Examples:

Publish hello at 10 Hz:

\$ rostopic pub -r 10 /topic_name std_msgs/String hello Clear the screen after each message is published:

\$ rostopic echo -c /topic_name

Display messages that match a given Python expression:

\$ rostopic echo --filter "m.data=='foo'" /topic_name Pipe the output of rostopic to rosmsg to view the msg type:

\$ rostopic type /topic_name | rosmsg show

rosparam

A tool for getting and setting ROS parameters on the parameter server using YAML-encoded files.

Commands:

rosparam set Set a parameter. rosparam get Get a parameter.

rosparam load Load parameters from a file. rosparam dump Dump parameters to a file. Delete a parameter. rosparam delete List parameter names. rosparam list

Examples:

List all the parameters in a namespace:

\$ rosparam list /namespace

Setting a list with one as a string, integer, and float:

\$ rosparam set /foo "['1', 1, 1.0]"

Dump only the parameters in a specific namespace to file:

\$ rosparam dump dump.yaml /namespace

rosservice

A tool for listing and querying ROS services.

Commands:

rosservice list Print information about active services. rosservice node Print name of node providing a service. Call the service with the given args. rosservice call List the arguments of a service. rosservice args rosservice type Print the service type.

Print the service ROSRPC uri. rosservice uri rosservice find Find services by service type.

Examples:

Call a service from the command-line:

\$ rosservice call /add_two_ints 1 2

Pipe the output of rosservice to rossrv to view the srv type:

\$ rosservice type add_two_ints | rossrv show

Display all services of a particular type:

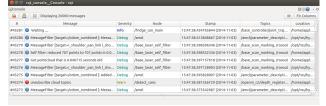

\$ rosservice find rospy_tutorials/AddTwoInts

ROS Indigo Cheatsheet

Logging Tools

rqt_console

A tool to display and filtering messages published on rosout.

Usage:

\$ rqt_console

rqt_bag

A tool for visualizing, inspecting, and replaying bag files.

Usage, viewing:

\$ rqt_bag bag_file.bag

Usage, bagging:

\$ rqt_bag *press the big red record button.*

rgt_logger_level

Change the logger level of ROS nodes. This will increase or decrease the information they log to the screen and rgt_console. Usage:

viewing \$ rqt_logger_level

Introspection & Command Tools rqt_topic

A tool for viewing published topics in real time.

Usage:

\$ rqt

Plugin Menu->Topic->Topic Monitor

rqt_msg, rqt_srv, and rqt_action

A tool for viewing available msgs, srvs, and actions. Usage:

\$ rqt

Plugin Menu->Topic->Message Type Browser

Plugin Menu->Service->Service Type Browser

Plugin Menu->Action->Action Type Browser

rqt_publisher, and rqt_service_caller

Tools for publishing messages and calling services. Usage:

\$ rqt

Plugin Menu->Topic->Message Publisher

Plugin Menu->Service->Service Caller

rqt_graph, and rqt_dep

Tools for displaying graphs of running ROS nodes with connecting topics and package dependancies respectively.

Usage:

\$ rqt_graph

***** + *

\$ rqt_dep

rqt_top

A tool for ROS specific process monitoring.

Usage:

\$ rqt

Plugin Menu->Introspection->Process Monitor

rat_reconfigure

A tool for dynamically reconfiguring ROS parameters. Usage:

Plugin Menu->Configuration->Dynamic Reconfigure

Development Environments

rgt_shell, and rgt_py_console

Two tools for accessing an xterm shell and python console respectively.

Usage:

\$ rqt

Plugin Menu->Miscellaneous Tools->Shell

Plugin Menu->Miscellaneous Tools->Python Console

Data Visualization Tools

tf_echo

A tool that prints the information about a particular transformation between a source_frame and a target_frame.

Usage:

\$ rosrun tf tf_echo <source_frame> <target_frame>

Examples:

To echo the transform between /map and /odom:

\$ rosrun tf tf_echo /map /odom

view frames

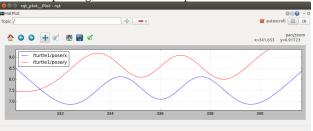

A tool for visualizing the full tree of coordinate transforms.

\$ rosrun tf2_tools view_frames.py

\$ evince frames.pdf

rat_plot

A tool for plotting data from ROS topic fields.

Examples:

To graph the data in different plots:

\$ rqt_plot /topic1/field1 /topic2/field2

To graph the data all on the same plot:

\$ rqt_plot /topic1/field1,/topic2/field2

To graph multiple fields of a message:

\$ rqt_plot /topic1/field1:field2:field3

rqt_image_view

Usage:

\$ rqt_image_view

ROS Indigo Catkin Workspaces

Create a catkin workspace

Setup and use a new catkin workspace from scratch.

Example

```
$ source /opt/ros/hydro/setup.bash
$ mkdir -p ~/catkin_ws/src
$ cd ~/catkin_ws/src
$ catkin_init_workspace
```

Checkout an existing ROS package

Get a local copy of the code for an existing package and keep it up to date using wstool.

Examples:

```
$ cd ~/catkin_ws/src
$ wstool init
$ wstool set tutorials --git git://github.com/ros/ros_tutorials.git
$ wstool update
```

Create a new catkin ROS package

Create a new ROS catkin package in an existing workspace with catkin create package. After using this you will need to edit the CMakeLists.txt to detail how you want your package built and add information to your package.xml.

Usage:

```
$ catkin_create_pkg <package_name> [depend1] [depend2]
```

Example:

```
$ cd ~/catkin_ws/src
$ catkin_create_pkg tutorials std_msgs rospy roscpp
```

Build all packages in a workspace

Use catkin_make to build all the packages in the workspace and then source the setup.bash to add the workspace to the ROS_PACKAGE_PATH.

Examples:

```
$ cd ~/catkin_ws
$ ~/catkin_make
$ source devel/setup.bash
```
